

## SUPREME WISDOM COUNCIL OF INDIA

### The 3 Tiers and 5 Pillars Of Democracy

SWCI - SUPREME WISDOM COUNCIL OF INDIA - is Golden India's pragmatic proposal for the present plight of India in response to the critical crises that plague the country / our Mother-India.

In ancient India there used to be always a place and a presence of a RajGuru, RajRishi, as the Supreme Head of Dharma (the Values of the Kingdom and of its people) to guide the King's governance in accordance with Dharma (Values).

The policies and the laws of the land were guided and directed by and were ALWAYS in consonance with these Values. Neither the King nor his ministers could compromise, violate or go against these fundamental Values.

These Values were citizen-friendly, easily comprehensible, pragmatic, sustainable, non-redundant, maximally broad-spectrum-ed, all-inclusive and empowered to prevent the presence and growth of greed, corruption, communal disharmony etc.

They contained a time-tested potentate program to induce and promote individual and collective human happiness and inner fulfillment, to foster the principles of "Unity+Mutuality+Harmony in Collective-Living", the essence of the principles of Collective Co-existence and Glocal Governance in Nature.

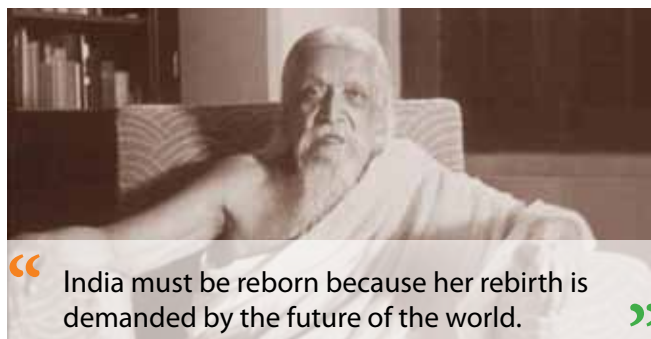

Justice was then swift and satisfactory. Living was simple, secure, harmonious, happy, purposeful and materially & spiritually fulfilling.

“ Society does not go down because of the activities of criminals, but because of the inactivities of the good people. ”

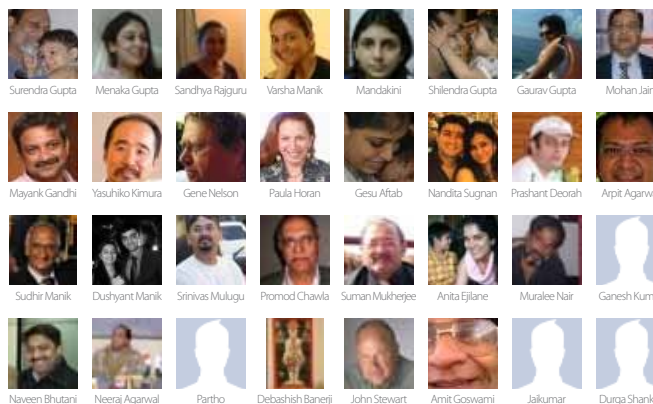

Swami Vivekanand

# Problems, People, Politics

## PROBLEMS EXIST ONLY WHERE PEOPLE EXIST; NO PEOPLE, NO PROBLEMS!!

Does this mean people CREATE or ARE themselves the problems? In a way YES, in a way NO – depending on HOW we THINK and FEEL.

Or, are problems our outer indicators of some inner significance that we are often too preoccupied to even notice?

Problems are pointers that call for course corrections, re-reflection, introspection, re-alignment, reconsideration – to unlearn and re-learn. Since we are a race of social, gregarious human beings, we are preprogrammed to live with others in harmony, learn to survive the ordeals, fulfill our inner urges and evolutionary impulses and evolve in togetherness in a collective, community living.

Our outer collective living needs to be suitably organized. How we organize ourselves as a group and our collective-living determines the health and happiness of all its constituent members. Likewise, the infrastructure we create for a rich fulfillment of our needs, desires, ambitions and aspirations will determine our future.

Politics, the art of governance of people, is not a business. It must perennially focus first on the survival and on the quality of living of ALL citizens without discrimination. It should be primarily a Service-before-Self.

And without first understanding the complexities of people, their mind-heart-body-soul, without first creating the channels of energy & communication for the flow of their thoughts, feelings, emotions, desires, needs, difficulties, compulsions, tribulations, struggles, pain & helplessness etc., how can the problems be addressed, redressed or resolved???

## Activate The Dream You Want India To Be

### KNOW & BELIEVE

1. What is India to us?
  - Merely a land of rivers, mountains & valleys? Or
  - Mother-land, matri-bhoomi, our own mother?
2. Believe in a power that is greater than man - call it god or supreme intelligence that organizes & runs nature.

3. Believe in yourself and in thy neighbor, for god lives less in a temple, mosque or church, but most in our heart.
4. Sincere service to the highest in us & others is true service to god, humanity, nation & oneself.

### INTROSPECT & ADOPT

1. Atithi devo bhavah.
2. Do unto others what thou would have others do unto you.
3. Live in freedom, not by license - responsibility before right \* duty before demand
4. Live materially or spiritually, but live with responsibility and accountability.
5. Become trustworthy & be grateful, helpful & happy

### BUILD TRUST

Without trust there is no credibility. Everyone, everyone's intent, thought, feeling and action is suspect.

With trust human actions yield faster results, better quality of life and higher fulfillment; socio-economic development and growth of the nation would then have a secure and sustainable foundation.
